SUMMARY OF QUALIFICATIONS

Full-stack developer with 4+ years of experience in Node.js, Express, React.js, and Redux, building scalable applications for high-traffic environments.

Proven track record in performance optimization, improving load times by 25% and reducing API response times to 35% through system migrations and efficient architecture.

Experienced in modernizing applications (Electrode to Next.js, Java to Node.js) and working within Agile Scrum teams.

Skilled in CI/CD pipeline management using Jenkins and log monitoring with Splunk for production support and debugging.

EDUCATION

University of Lahore

Bachelor of Science in Computer Science

Lahore, Punjab, Pakistan

Aug 2017 - Jul 2021

WORK EXPERIENCE

Software Engineer – Luminogics

Lahore, Pakistan

Sep 2021 - Jan 2026

Client: Staples (USA)

- Developed and maintained scalable microservices using **Node.js** and **Express**, serving thousands of daily users.
- Built responsive, reusable UI components using React.js and Redux, improving page performance and reducing load times by **25%**.
- Collaborated within **Agile Scrum** teams, actively participating in sprint planning, reviews, and retrospectives.
- Migrated the entire website from **Electrode** (Walmart's framework) to the latest **Next.js** architecture.
- Migrated backend services from a **Java-based layer** to **Node.js**, reducing API response time to 35%.
- Worked with **Jenkins** to run CI/CD pipelines and manage application deployments.
- Utilized **Splunk** to write queries and analyze logs for effective debugging and monitoring.

Projects

Being Humans (beinghuman.com) — Full-Stack Developer

- Contributed to the development of a web platform using Next.js, React.js, and Node.js, delivering scalable and responsive user experiences.
- Implemented OCR-based functionality to enable text extraction and processing within the application.
- Developed and integrated backend services and APIs to support core platform features and data handling.
- Collaborated with a cross-functional team to design, build, and enhance key functionalities aligned with business requirements.

Aquafina Bulk Delivery

- Developed and maintained an admin panel for end-to-end order management in a bulk water delivery system, enabling real-time tracking, scheduling, and status updates.
- Built RESTful APIs using Node.js to handle order processing, customer data, and delivery workflows with scalable backend architecture.
- Integrated secure payment gateways, ensuring reliable transaction processing and proper error handling for failed or partial payments.
- Implemented role-based access control and optimized database queries to improve system performance and administrative efficiency.

Pendulum 3d

- Built an interactive 3D data visualization system using Three.js, transforming large-scale social media data into dynamic “mountain peak” terrains for intuitive pattern recognition.
- Designed and implemented data aggregation pipelines to scrape and normalize data from multiple social media sources, ensuring consistency and real-time usability.
- Engineered custom geometry and shaders to represent data density, trends, and anomalies as elevation and surface variations in a 3D landscape.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3	Architecture: Microservices, REST APIs
Frontend: React JS, Next JS, Redux, Tailwind CSS, ThreeJS	DevOps & Tools: Git, GitHub, Docker (Basic), CI/CD
Backend: Node.js, Express.js	Pipelines, Swagger, Postman
Databases: SQL Server, MongoDB	Practices: Agile/Scrum, Code Reviews, Performance Optimization, Caching Strategies

CERTIFICATIONS

Certified SAFe® 5 Practitioner	Jul 2022
SAFe by Scaled Agile, Inc
